

Having FOUR drivers is equivalent to having FOUR speakers in each ear exclusively dedicated to silky highs, detailed mids, and deep bass. Every nuance comes alive like hearing your favourite music for the first time.

- **FOUR DRIVERS**

Diamond-like carbon dynamic driver and three balanced armatures deliver unsurpassed dynamic power and definition.

- **EXPERTLY TUNED**

Tuned by four-time Grammy® winning sound engineer Luca Bignardi to deliver a precise representation of your favourite music.

- **METICULOUS DESIGN**

Streamlined aluminum sound chamber with perfected ergonomics ensures exceptional comfort and noise isolation.

- **INTELLIGENT CONTROLS WITH MICROPHONE**

Conveniently located in-line controls allow you to effortlessly change volume, skip songs, and make crystal clear calls.

- Gold-Plated 3.5mm to 6.35mm Adapter
- Airline Adapter
- Shirt Clip
- 1MORE Vinyl Sticker

FEATURES

- A built-in chip automatically identifies your smartphone, tablet, or computer's operating system allowing you to make calls, control volume, and adjust tracks. A superior MEMS microphone delivers exceptional talk quality.
- 45° oblique angled ear fittings naturally match your ear canals ensuring a secure fit, proper noise isolation, and an intimate sound stage.
- Streamlined aluminum sound chambers with tungsten textured accents flow like a jet engine yet are designed for premium comfort and sonic spaciousness while eliminating ear fatigue.
- With a high frequency range that extends to 40,000 Hz music takes life with transience, an acoustic quality that creates a soulful sense of realism. From a singer's breath to the shimmer of a cymbal, you will hear musical elements you've never heard before.
- With a lightweight crystalline structure nothing transfers sound waves more accurately without distortion than a Diamond-Like Carbon Driver, which handles midrange and bass while two patented balanced armatures handle high frequencies and a third handles ultra-high frequencies for immaculate definition.
- Tangle resistant and tough, our Kevlar core cable is extremely durable while oxygen-free copper ensures pristine audio.
